Posterior histograms for σ_k^2

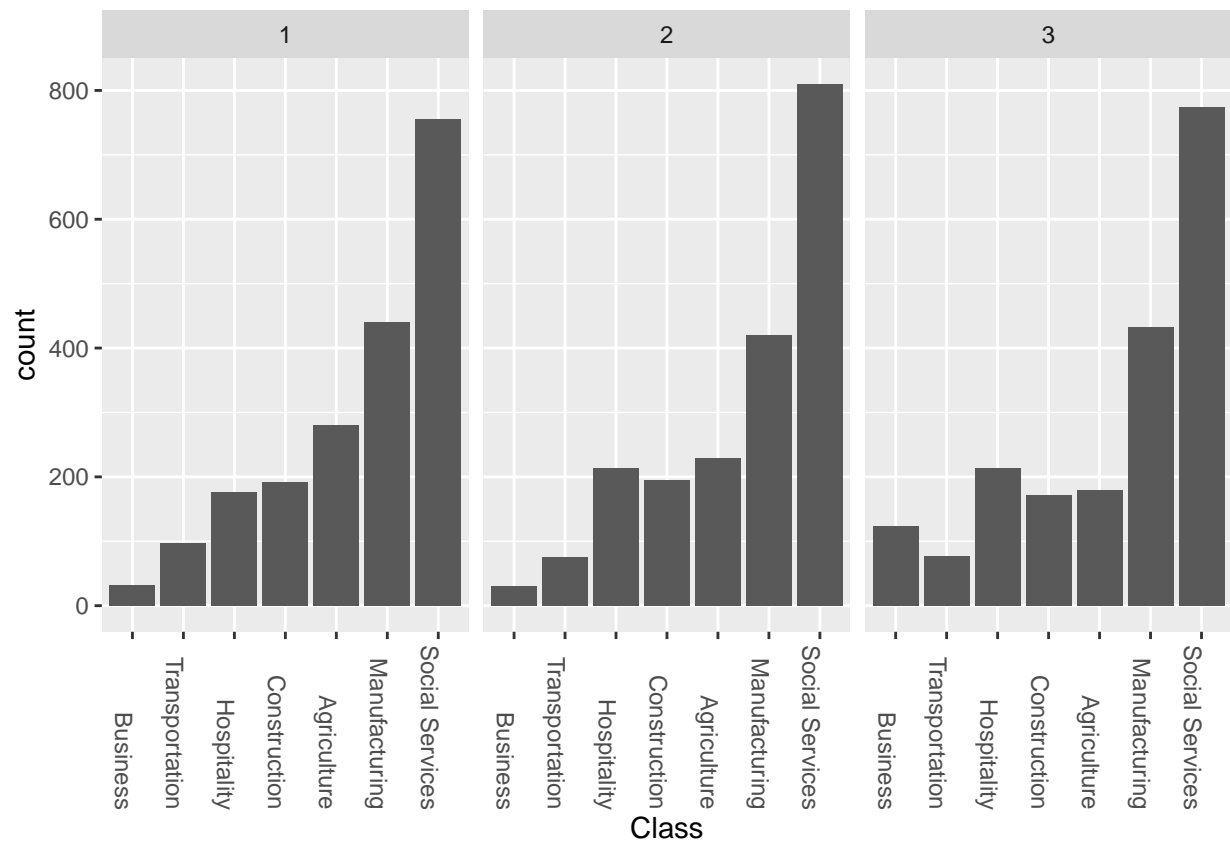

Plotting posterior histograms from σ_k^2 parameters.

Computing empirical wage variances across firm classes.

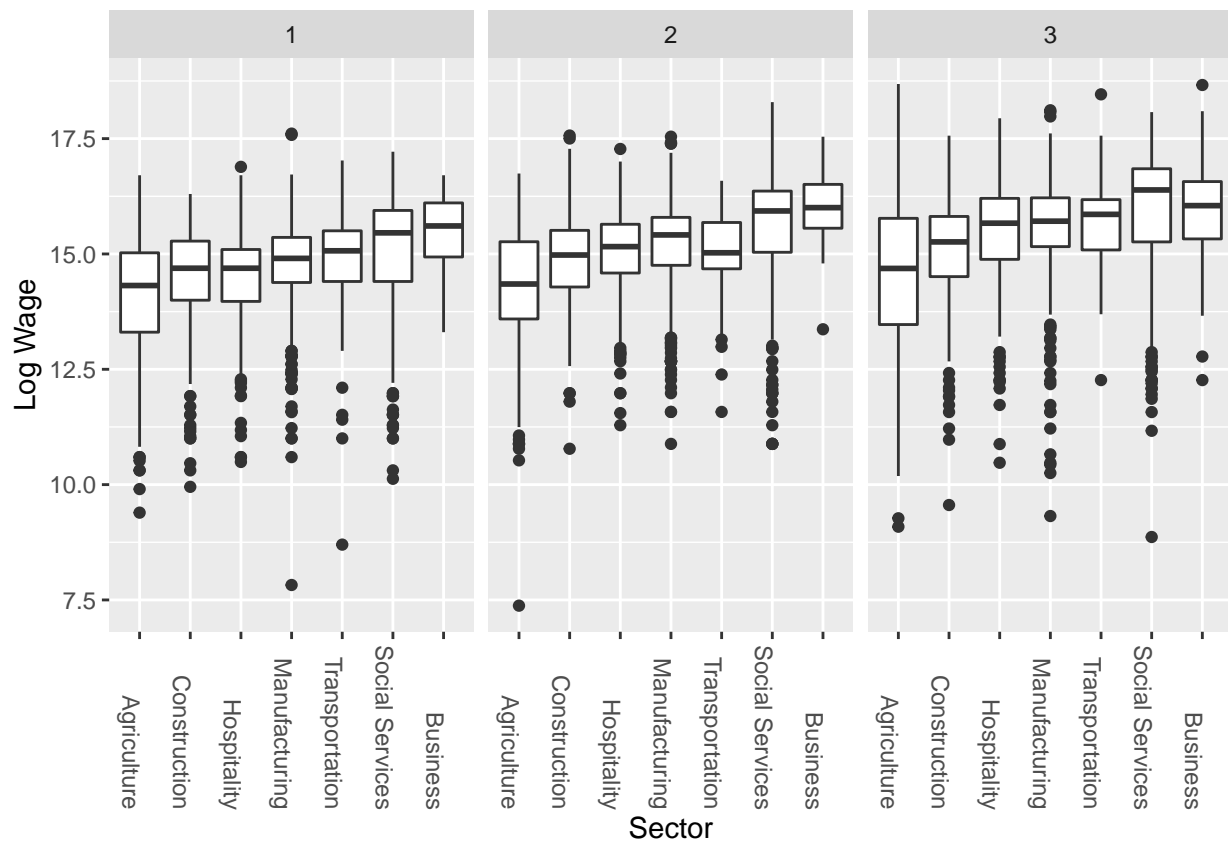

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

Size of each Class over Time

Log wages by Class and Time

Plot latent space positions

Latent Space Positions with MDS - see other document

Probability transition plots - Posterior medians

Probability transition plots - Data
