Posterior histograms for σ_k^2

Plotting posterior histograms from σ_k^2 parameters.

Computing empirical wage variances across firm classes.

```
## `stat_bin()` using `bins = 30`. Pick better value with `binwidth`.
```

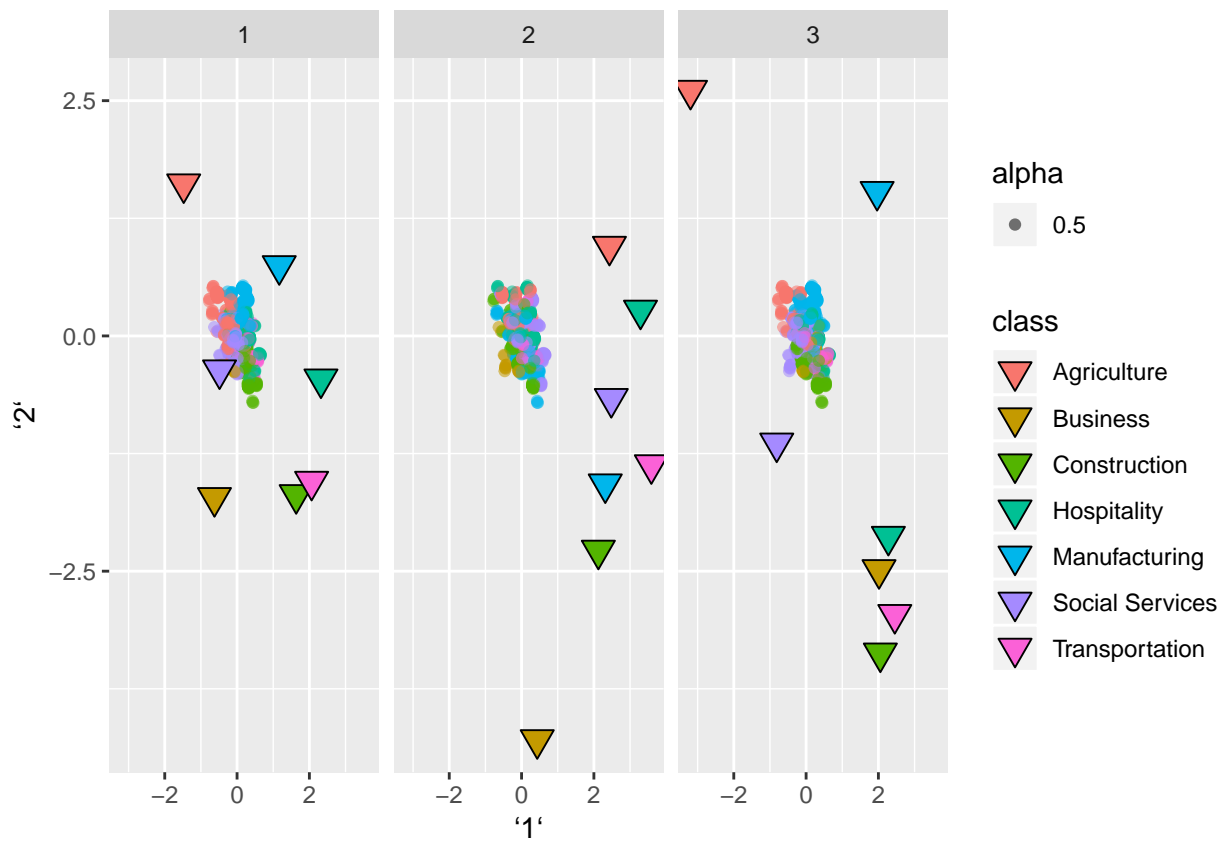

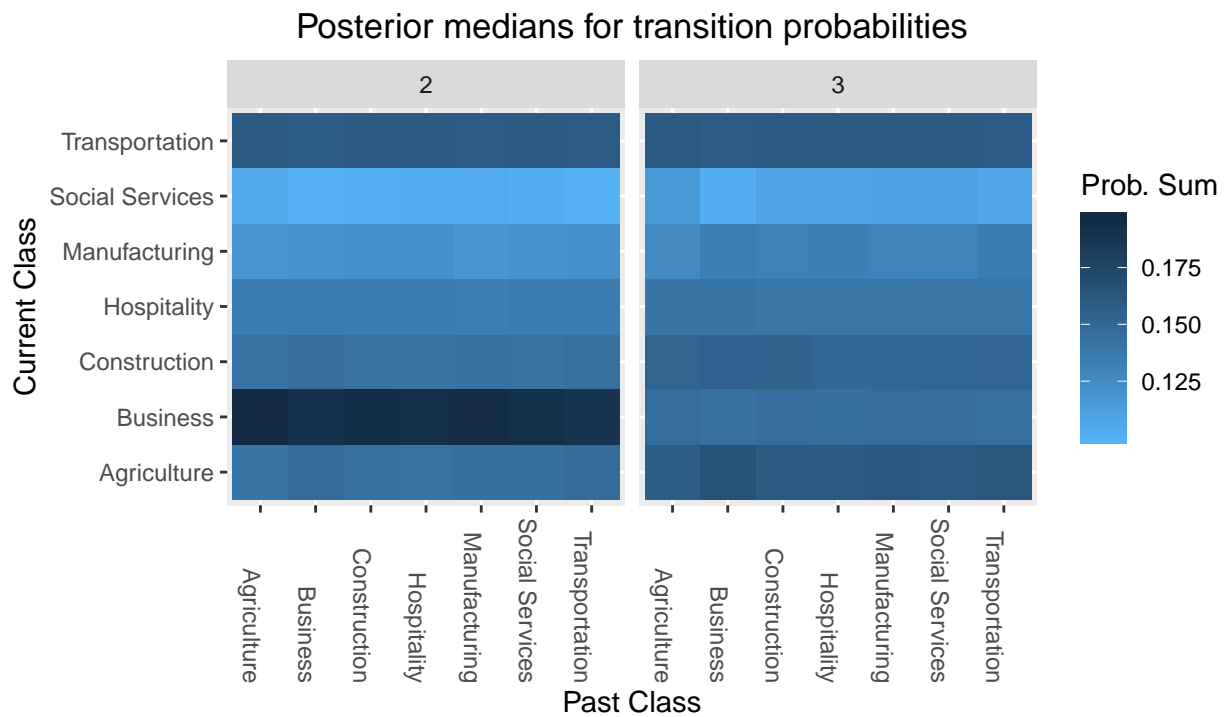

Posterior Variances for Classes

Size of each Class over Time

Log wages by Class and Time

Plot latent space positions

Probability transition plots - Posterior medians

Posterior medians for transition probabilities

Probability transition plots - Data

True transition probabilities
